Python

C/C++

Flutter

Java

Android Development

Firebase

Amazon Web Service

HTML/CSS

Bug Bounty/Pen-testing

Adobe Photoshop

Adobe Illustrator

Adobe After Effects

PROJECTS

Game Development – GTA 5 - FiveM
This GTA5 game is a story-based game, I have used these game features like maps, cars, characters, etc. and made an Online Multiplayer Game with the help of FiveM (This Supports Story Games to Multiplayer games). I have created scripts using Lua language like Car Handling, Shooting, Character Creations, etc. This is a Virtual world where Players can play with their friends.

Password Manager - Flutter Development
I created a Password Manager application for Android and IOS in flutter. Password manager is a app that stores usernames and passwords for multiple applications securely, and in an encrypted format with modern UI design.

Weather Application
Android App Development
This Application Is made by Android Studio, where which Application Shows Real-time weather, temperature, wind speed, and date time of the city. The data is collected from a Forecast site through API.

2D Bubble Shooter Game
Computer Graphics
This Game is made using C++ and OpenGL Functions. The game's goal is to clear the playing field by forming groups of three or more marbles of the same color. The game ends when the balls reach the bottom line of the screen.

Hospital Management System
DBMS (Database Management System)
This HMS where manages all the information about hospitals, Patients, Medicine, and hospitals in the database.
